PROFESSIONAL EXPERIENCE

Web & AI Developer | HANJICREATIONS

May 2025 – Present

- Develop responsive WordPress, Shopify and custom web solutions (HTML5, CSS3, JavaScript, PHP) for clients across e-commerce, government, manufacturing, food, fashion, hospitality, cosmetics and professional services.
- Built the Mata Payals Shopify website (matapayals.com) using Shopify Liquid, with responsive layouts, product presentation and ongoing updates.
- Built PatentManiac, a patent-services website structured for US audiences, with SEO-focused content, user-journey design and Google Search Console tracking.
- Deliver custom client projects including the Kho Kho Federation of India, Universal Remedies and Trident Valves (details under Projects).
- Integrate AI chatbots and AI assistants into WordPress and Shopify client projects.
- Use generative AI to create product images, promotional videos and banners, and to write SEO-focused titles, meta descriptions and FAQs, speeding up delivery.

Web Developer | SOCIAL EMERGER WEB SOLUTIONS

Jul 2023 – May 2025

- Developed and optimized business websites and e-commerce platforms using WordPress, Elementor, HTML, CSS/SCSS, JavaScript, jQuery and PHP.
- Built responsive WordPress sites with structured content, SEO-focused pages and conversion-oriented layouts.
- Built the Zohra's Coffee Shop Shopify website (zohrascoffeeshop.com) using Shopify Liquid, with responsive layouts and content updates.

- Developed a course-selling platform with landing pages, on-page SEO and user-experience improvements, tracked through Google Analytics and Search Console.
- Managed domains, hosting, maintenance and third-party/API integrations across client projects.
- Applied generative AI tools to speed up SEO content creation and repetitive website tasks.

Web Developer | PRUDENTIAL BIOTECH Nov 2022 – May 2023

- Developed business and e-commerce websites using WordPress, WooCommerce, HTML, CSS, JavaScript and PHP.
- Built an e-commerce platform with product organization, responsive layouts, shopping workflows and Razorpay and Stripe payment gateway integration.
- Implemented SEO, lead-generation pages, product banners and ongoing website maintenance.

PROJECTS

TravelBit Holidays – Travel Website & Travel CRM (travelbitholidays.com)

- Built the travel website and travel CRM using WordPress, PHP, Laravel, React and MySQL, with ACF components, REST API integration and headless WordPress with GraphQL feeding the React front end.
- Built the CRM to manage customer bookings and generate invoices for the travel business.

AI-Powered WordPress Business Assistant (Custom WordPress Plugin)

- Built a custom WordPress plugin in PHP and JavaScript that works end-to-end with AI: requests go through the WordPress REST API to the Gemini API (Google AI Studio) in the background, and results appear directly inside WordPress.
- Generates SEO-focused content from existing page content for any page, including SEO titles, meta descriptions, product and service descriptions, FAQs, social captions, blog outlines, CTAs and keyword suggestions.

AI SEO & Content Automation System (Custom WordPress Plugin)

- Built a multi-option WordPress plugin that analyzes page content and gives SEO suggestions using generative AI (Gemini API via Google AI Studio) for metadata, keyword suggestions, FAQs and content improvements.
- Works with Elementor, Gutenberg and other page builders, on posts as well as pages, automating repetitive content and technical SEO tasks.

Kho Kho Federation of India – Government Website

- Built and currently maintain a custom WordPress website (PHP, JavaScript, MySQL) with live database-driven information, data collection and structured information management.
- Handle server and DNS configuration, deployments and maintenance, using WP-CLI for routine tasks.

Universal Remedies – E-commerce Website

- Built an Ayurvedic e-commerce website on WordPress with custom components in HTML5, CSS3 and JavaScript, a Vite and Node.js front-end build, and responsive shopping experiences.
- Designed product mockups in Figma and created product content, promotional banners and videos, using AI image and video generation for creative production.

Trident Valves – Industrial Website

- Built a responsive industrial website on WordPress using HTML5, CSS3 and JavaScript, with structured product presentation and cross-device compatibility.
- Optimized images, front-end code and site structure for Core Web Vitals and technical SEO, delivering up to 10x faster page loads.

EDUCATION

Bachelor of Computer Applications (BCA) 2022 – 2025
Indira Gandhi National Open University, New Delhi, India

Diploma in Website Engineering 2022 – 2024
Indian Institute of Computer Science, New Delhi, India
